Replace five spreadsheets nobody opens with one interactive Excel dashboard where revenue, KPIs and trends are obvious at a glance — a report managers read instead of forward. Native Excel: real charts, slicers and automation you keep and update yourself.

WHAT I BUILD

- Interactive dashboard with KPI cards and slicers
- The charts that fit your data — trend, comparison, breakdown, target vs actual
- Data cleaning and automated calculations with one-click refresh
- A short executive summary of what the numbers are telling you

FAQ

Will it stay editable?

Yes — native Excel; update the data and everything refreshes.

Can you automate the reporting?

Yes — formulas, KPI calcs, dynamic ranges, refresh on new data.

Is my data confidential?

Always — private, NDA on request.

About the seller — I'm Atakan, a mechanical engineer (MSc) who spent years in aviation and procurement drowning in spreadsheets — so I learned to build the dashboards I wished I'd had. Today I turn messy Excel exports into clean, interactive dashboards a manager can read in ten seconds. Everything I build is native Excel — real charts, KPIs, slicers and automation, not screenshots. See live samples at data.vexloft.com and open the exact Excel file behind each one.
