WHAT I BUILD

- Inventory value by category, warehouse and product
- Live stock status — in stock / low / reorder / out — with alerts
- Reorder point tracking and top-SKU-by-value analysis
- Inventory turnover and lead-time KPIs

FAQ

- Can you add reorder alerts?**
Yes — automatic flags below your reorder point, colour-coded by urgency.
- Can it handle multiple warehouses?**
Yes — filter and compare by warehouse, category or status.
- Is my data confidential?**
Always — kept private, NDA on request.

About the seller — I'm Atakan, a mechanical engineer (MSc) who spent years in aviation and procurement drowning in spreadsheets — so I learned to build the dashboards I wished I'd had. Today I turn messy Excel exports into clean, interactive dashboards a manager can read in ten seconds. Everything I build is native Excel — real charts, KPIs, slicers and automation, not screenshots. See live samples at data.vexloft.com and open the exact Excel file behind each one.
