

Inventory Management Dashboard

Reorder before you run out. Not after.

■ **Explore it live** data.vexloft.com/inventory

Stockouts lose the sale; dead stock ties up the cash. AeroParts tracks fifty parts across three warehouses, and this dashboard gives them a live read on all of it — what's on hand, what it's worth, and exactly which SKUs have dropped below their reorder point. The parts that need attention are colour-coded and pushed to the top, so the buyer sees them first thing in the morning, not after a customer calls.

Live interactive dashboard — filter, drill down, then open the real Excel file behind it.

WHAT IT DELIVERS

- Inventory value by category and warehouse
- Live stock-status split — in stock, low, reorder, out
- Top SKUs by value, ranked
- Automatic reorder-alert list, sorted by urgency
- Turnover and average lead-time KPIs

WHY IT MATTERS

- Never get caught out by a stockout again
- Free up cash sitting in overstocked shelves
- Give the buyer a to-do list, not a spreadsheet
- Filter to any category, warehouse or status instantly
