

Procurement & Supplier Dashboard

See where the money goes — and which suppliers earn it.

■ Explore it live data.vexloft.com/procurement

Procurement without visibility is just paying invoices and hoping. This board tracks every euro Meridian spends — by category, by supplier, by month — and flags the purchase orders that are open or overdue. Then it scores each supplier on the three things that actually matter: do they deliver on time, is the quality there, and is the price right. The weak links show up as a C. The ones worth a long-term contract show up as an A.

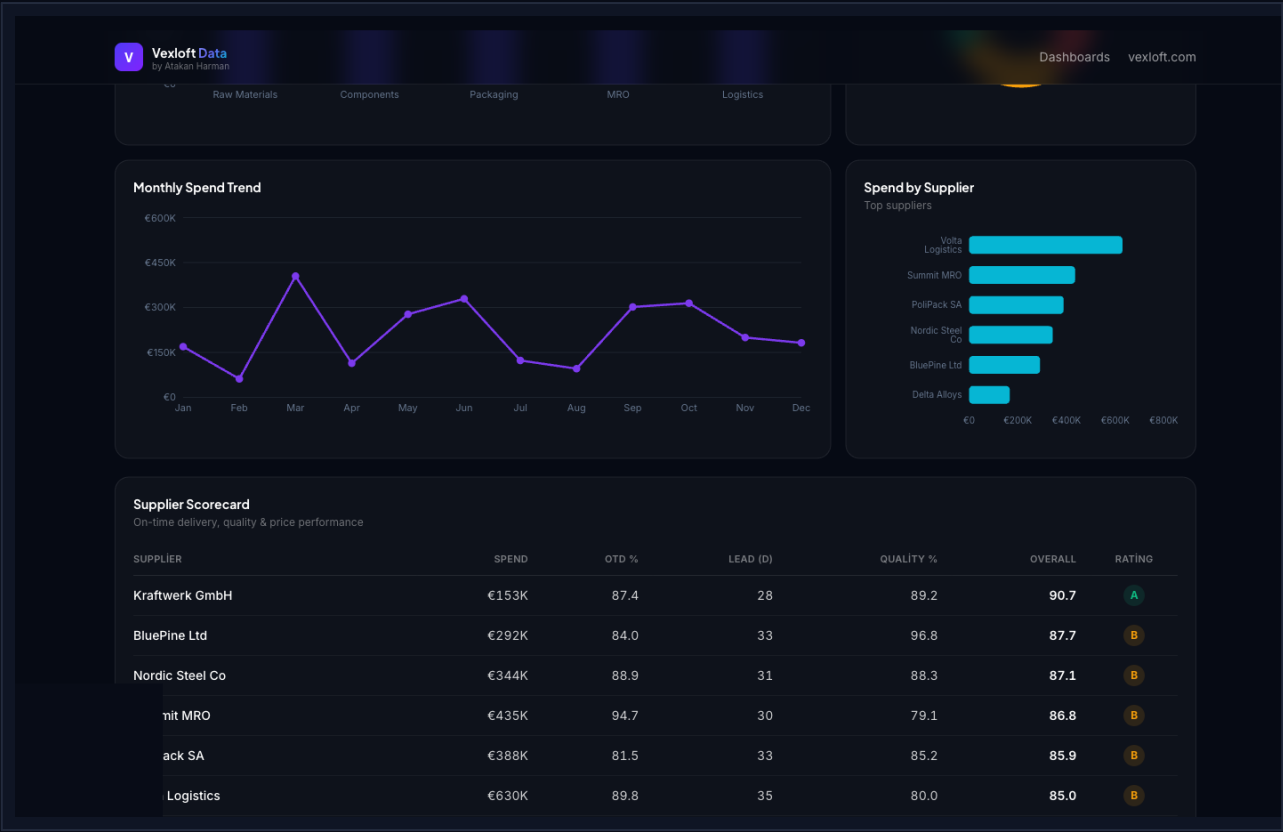

Live interactive dashboard — filter, drill down, then open the real Excel file behind it.

WHAT IT DELIVERS

- Spend analysis by category and by supplier
- Open vs overdue purchase-order tracking
- Monthly spend trend
- Supplier scorecard — OTD, quality, price, A–C rating
- Savings-versus-baseline KPI

WHY IT MATTERS

- Know your biggest spend before contracts renew
- Hold suppliers to numbers, not gut feel
- Catch overdue orders before they stall production
- Walk into negotiations with the scorecard in hand

Every chart, KPI and table is built natively inside the .xlsx — no screenshots, no images.
