Your whole store on one screen — revenue and orders month by month, average order value, conversion, and exactly which traffic sources and products pull their weight. The stuff you need to decide where to spend and what to restock.

Live, interactive demo: data.vexloft.com/ecommerce

WHAT I BUILD

- Revenue, orders, AOV, conversion & repeat-rate KPIs
- Revenue vs orders trend across the year
- Revenue and conversion by traffic source
- Top products and a full source-performance table

FAQ

Do you work with Shopify exports?

Yes — Shopify, WooCommerce, Amazon or any CSV/Sheets export.

Can you track traffic sources?

Yes — revenue, sessions and conversion per source, plus top products.

Is my store data confidential?

Always — private, NDA on request.

Search tags: ecommerce dashboard · shopify · sales analytics · conversion · excel

About the seller — I'm Atakan, a mechanical engineer (MSc) who spent years in aviation and procurement drowning in spreadsheets — so I learned to build the dashboards I wished I'd had. Today I turn messy Excel exports into clean, interactive dashboards a manager can read in ten seconds. Everything I build is native Excel — real charts, KPIs, slicers and automation, not screenshots. See live samples at data.vexloft.com and open the exact Excel file behind each one.
